ITINERARIO FIGURATO

negli Edifizj più rimarchevoli

DI ROMA

compilato

DA GIO. BATT. CIPRIANI

secondo il metodo del fu Visi

Sepolcro di S. Vibio Mariano

ROMA

1835

AI LETTORI

Tutte le umane imprese, ove non sieno interrotte, vanno al lor termine. Or io che da qualche anno diedi cominciamento a questo mio Itinerario figurato di Roma, l'ho compiuto con costante animo non facendo risparmio di applicazione e fatica a vederlo ultimato; ciò che mi è venuto di fare per divina grazia in toccando il settantesimo secondo anno del viver mio.

Qui mi è d'uopo il rendere palese a' viventi ed a' futuri alcune mie dichiarazioni, atte a far conoscere la utilità che questa mia Raccolta potrà recare agli studiosi, pregandoli di compatimento non trovandovi essi la piena loro soddisfazione.

Se i nostri antichi avessero avuto cognizione della pregevolissima arte dello incidere sul rame, e del riportarne la impressione sopra la carta, avrebbero per tal mezzo potuto lasciare a noi la veridica memoria de' rispettabili e dispendiosi loro edificj, nè saremmo rimasti soggetti a tante conghietture, tradizioni, discussioni e fantasie di uomini, che suscitarono infinite questioni e libelli che ad altro non servono, a parer mio, se non se ad occupare vacui posti nelle biblioteche senz' averci determinato cosa di vero a prò delle arti.

Il perchè considerando meco medesimo, che potrebbe il somiglievole (tuttochè più raramente) accadere a' futuri, perciocchè le opere umane sottoposte sono a frequenti mutazioni e dal tempo divoratore ad essere distrutte, diedi mano a produrre questa mia che presenta incise le fabbriche

de' nostri tempi come si osservano esse nei principali prospetti oggigiorno. Laonde per asseguir mio proposito volli da me medesimo per lungo travaglio osservare e disegnare sulla faccia de' rispettivi luoghi la massa di esse fabbriche e l'una dall'altra distinguere con l'odierna denominazione. A tale effetto mi fu cortesissima la compagnia del valente sig. Bartolomeo Mignanelli da Siena, giovine assai addottrinato in architettura e in altre scientifiche facoltà; perciò piacemi fargli memoria di gratitudine e di stima su queste carte.

Sebbene moltissime sieno le impressioni prospettiche e geometriche degli edificj romani, e sparse qua e là si trovino in grandi, magnifici e dispendiosi libri, impertanto volli compilarne uno solo in piccola proporzione, affinchè questo ne contenesse grandissima quantità con facilissimo ritrovamento de' medesimi a chi si volesse dilettare di specularvi. E siccome il Milizia nella sua Roma delle belle arti ne cita moltissimi, così chi volesse invenire alcuno di quelli nell'opera mia, potrà facilmente ricercarlo nell'indice appresso, e farselo quindi sott'occhio per considerare se quel severo critico bene o male sentì su quel monumento.

Tutti gli edificj de' quali presento la figura o la ristretta pianta non sono posti in giusto modello, per averli disegnati ad occhio, come dicesi, di proporzione. Che se avessi voluto darli in misura reale, non sarebbemi bastata la intiera vita. Inoltre se gli avessi fatti sopra una medesima scala, alcuni sarebbero venuti grandissimi, altri piccolissimi, e le tavole soperchiamente grandi; il che sarebbe riuscito contrario al mio concepimento di dare il tutto in raccolto piccolo spazio e piccolo volume, non per istudio fon-

damentale, ma per sola reminiscenza degli intelligenti uomini, e de' forestieri che siffatte cose ricercano.

Per rispetto alle piante e misure loro approssimative ho consultato sempre quelle del Nolli da cui discendono tutte le altre finora divulgate, affinchè lo studioso formi concetto della vastità dell' edificio, e possa ragguagliarlo alla rispettiva misura di sua nazione, giacchè il palmo romano da noi usato, e distinto con punto dagli altri numeri, è conosciutissimo.

Qualunque Itinerario descrittivo di Roma potrà servir di spiegazione alle mie tavole, quando si cerchi nell' Indice il nome del luogo, e si ricorra alla pagina ivi segnata.

Se lo studioso o amatore noterà nelle tavole alcun lieve difetto o mia disvoluta cosa (ciò che puote a chi molto lavora facilmente accadere) prego di compatire uno, il quale avendo preparato da se solo disegni e riduzioni, ed ancora fatte incisioni di cotanto svariata natura, sia caduto in mancamento da perdonare.

Io non dubito che questa mia faticata produzione condotta al suo fine in età avanzata d' assai, non sia per essere così gradita a' presenti, come non sarà forse disgradevole anche a' futuri, dacchè il mio principale scopo fu solo di rinnovare a' posteri e a' lontani la memoria delle fabbriche le quali si ebbero vedute una volta, se ne parla tra il conversare, e in appresso potrà parlarsene ancora.

Prego pertanto chiunque a compatire quel verace zelo che ho sempre avuto di rendermi per incisi lavori utile e insieme gradevole in qualsivoglia modo alla onesta società, per quanto mie forze di mano e di mente mi concedevano.

Roma questo dì 20 Marzo 1837.

G. B. Cipriani
